Blade

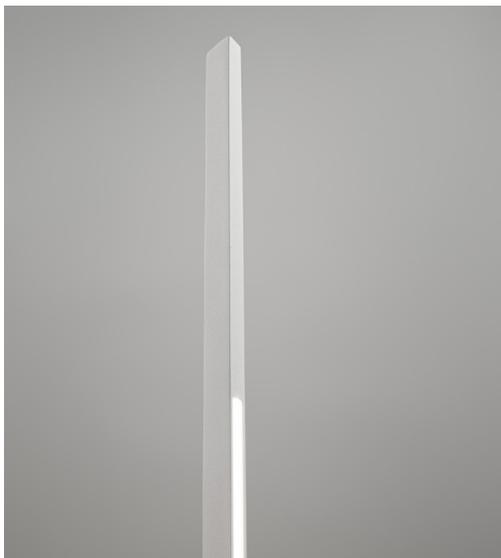

Blade interprets decorative lighting as a pure vertical element, a light blade developed over a 2.5-meter height.

A solution with strong architectural value, guiding the eye **upward** and enhancing volumes and heights without overpowering the space

Made up of an extremely slender aluminum stem, set on a **minimal, compact** base.

Blade is conceived to blend effortlessly into any environment. Painted or plated finishes in white, black, nickel and brass make it easy to match with furnishing details.

White

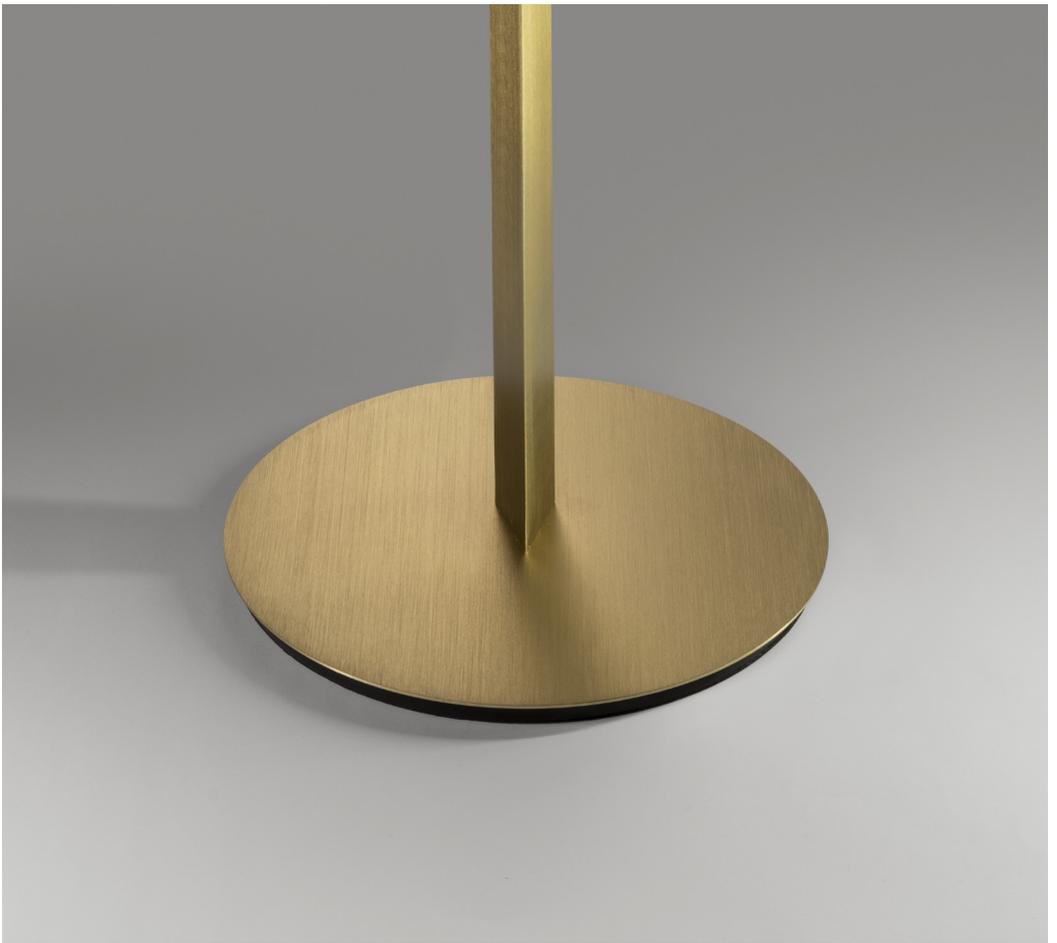

Black

Nickel

Brass

By day, the lamp is a discreet graphic presence; by night, it becomes adjustable ambience thanks to the **integrated dimmer**, allowing an easy transition from soft lighting to a more pronounced contribution.

LED

Integrated **LED technology**
(3000 K, 50,000 h lifetime).

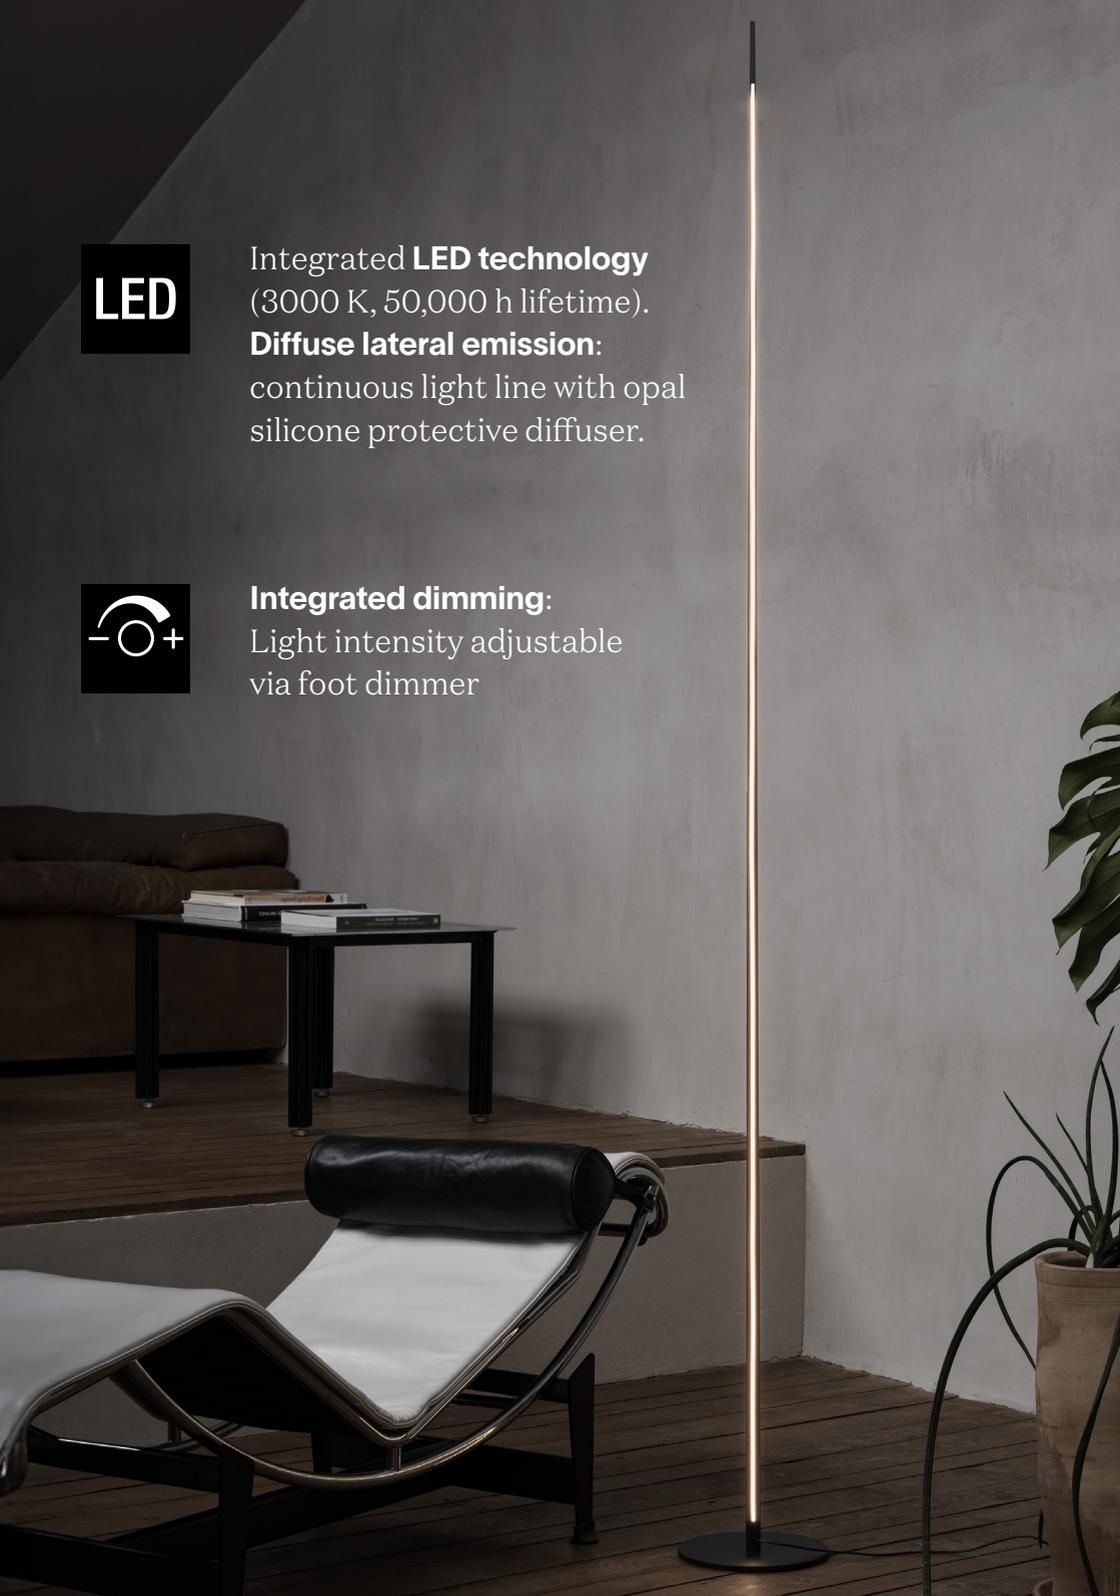

Diffuse lateral emission:

continuous light line with opal
silicone protective diffuser.

Integrated dimming:

Light intensity adjustable
via foot dimmer
