ideal lux®

Block

Block is an LED wall light for interiors with indirect light emission, resembling a thin and essential shelf, designed to give full space to the light.

The range is available in **three length and power modules**,
featuring high efficiency of over **85 lm/W**.

The integrated **D.O.B. (Driver on Board)** LED source, protected by a transparent polycarbonate diffuser, eliminates the need for an external driver and **keeps the design minimal**.
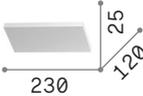

With its slim silhouette and clean, minimalist design,
Block integrates effortlessly into any interior setting.
Perfect for living areas, corridors, bedrooms, and passageways,
it **delivers powerful yet refined ambient lighting**.
