Bloom

Bloom presents a wide range, featuring four external glass diameters and adaptable to multiple installation styles.

The image features two modern pendant lights against a light gray background. The light in the foreground is gold-colored with a ribbed, spherical glass shade and a white, oval-shaped diffuser. The light in the background is black with a similar ribbed, spherical shade and a white, oval-shaped diffuser. The text is centered in the upper half of the image, overlaid on the white diffuser of the black light.

Bloom enhances the beauty of interior materials and finishes, combining contemporary style with two thoughtfully matched frame-and-glass options.

A 'glass flower': an outer shell enveloping an inner sphere of frosted white glass, creating a soft, diffused light effect.

The combination of brushed brass and transparent ribbed amber glass is perfect for interiors with warm tones, such as wood, natural fabrics, and cream shades.

Versions with a black frame and frosted gray glass are designed for interiors featuring more contrasting finishes, such as dark metals, cool stones, and monochromatic schemes.

The outer glass transforms from unlit to lit,
adding presence and a subtle tactile depth to the light

Bloom compact diameters suit passageways or bedside placements, alone or paired, whereas the larger spheres enhance dining tables, living areas, or relaxation spaces.

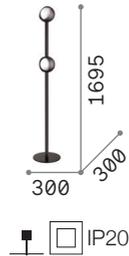

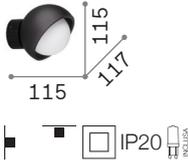

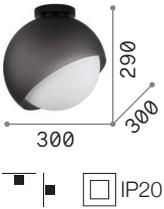

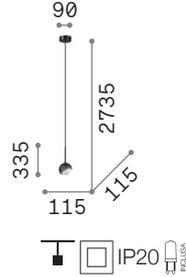

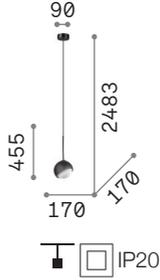

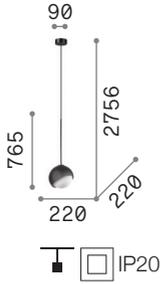

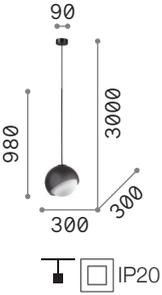

Through a combination of diameters and finishes, **Bloom** creates aesthetic continuity and clear visual hierarchies in both residential and hospitality interiors.

Bulb versions (E27 or G9
depending on the model).
Floor lamp with **integrated LED**.
