Dorica

Dorica is a decorative residential product with a complete and coherent range: single or triple pendants, single or triple floor lamps, table and wall lamps.

Cylindrical body, smooth or fluted,
with an opalescent side cut
for a distinctive luminous effect.

**An essential
luminous gesture,
defined by a
personality that
enhances a
space even when
switched off.**

The **suspended** versions, ranging from the single fixture with a strong horizontal presence to the triple configuration with its balanced spatial rhythm, are ideal above small to medium-sized tables or along a narrow island.

The **wall-mounted** version enhances living rooms, corridors and bedrooms. Bold colours create a deliberate and striking contrast within a monochromatic interior palette.

The **table versions** decorate console tables and bedside tables. Neutral tones and brushed metals blend seamlessly into balanced interiors, especially when they echo existing details.

Floor lamps integrate perfectly into living corners, beside a sofa or along the path between entrance and living area, with the lateral beam providing effective ambient indirect lighting.

Finishes

The slim and precise form is available in **9 finishes**: painted ribbed or smooth brushed, including bold “pop” colours (blue and orange) and refined metallic finishes (brass, copper, bronze, steel).
