

ideal lux[®]

Eclipse

Eclipse is an indoor pendant light that combines the timeless prestige of glass with a pure geometry, free from any unnecessary detail.

The optical system directs the light downward,
while the wide, slim sandblasted glass diffuser contains
the emission and softens its perception.

The finishes are conceived to blend naturally into contemporary living spaces: grey glass paired with a black structure for a richer, more textural presence, or clear glass with a white structure for a lighter, more luminous effect.

Eclipse is ideal above dining tables and kitchen islands: it illuminates the surface, enhances the social area, and creates a contemporary atmosphere **while maintaining visual lightness.**
