

ideal lux[®]

Post-it

Post-it is an ultra-slim LED wall light for outdoor use, designed to create a grazing light effect with minimal visual impact. Available in **single-emission** and **double-emission** versions.

Post-it ensures maximum visual compactness with a thickness of just **15 mm**: the depth of the fixture disappears, **leaving only a precise line of light.**

The white, black, coffee, steel and brass finishes allow seamless integration with contemporary architecture and outdoor materials such as plaster, brick, stone, and wood.

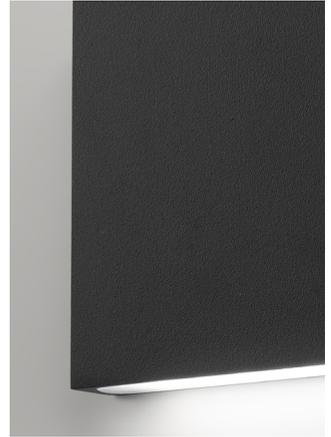

Ideal for defining pathways, corridors, and staircases, or for creating orientation points in residential interiors.

Steel

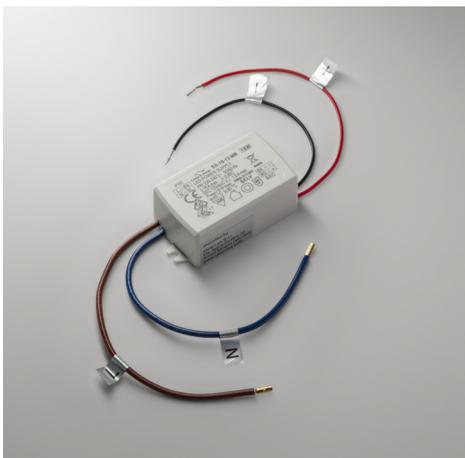

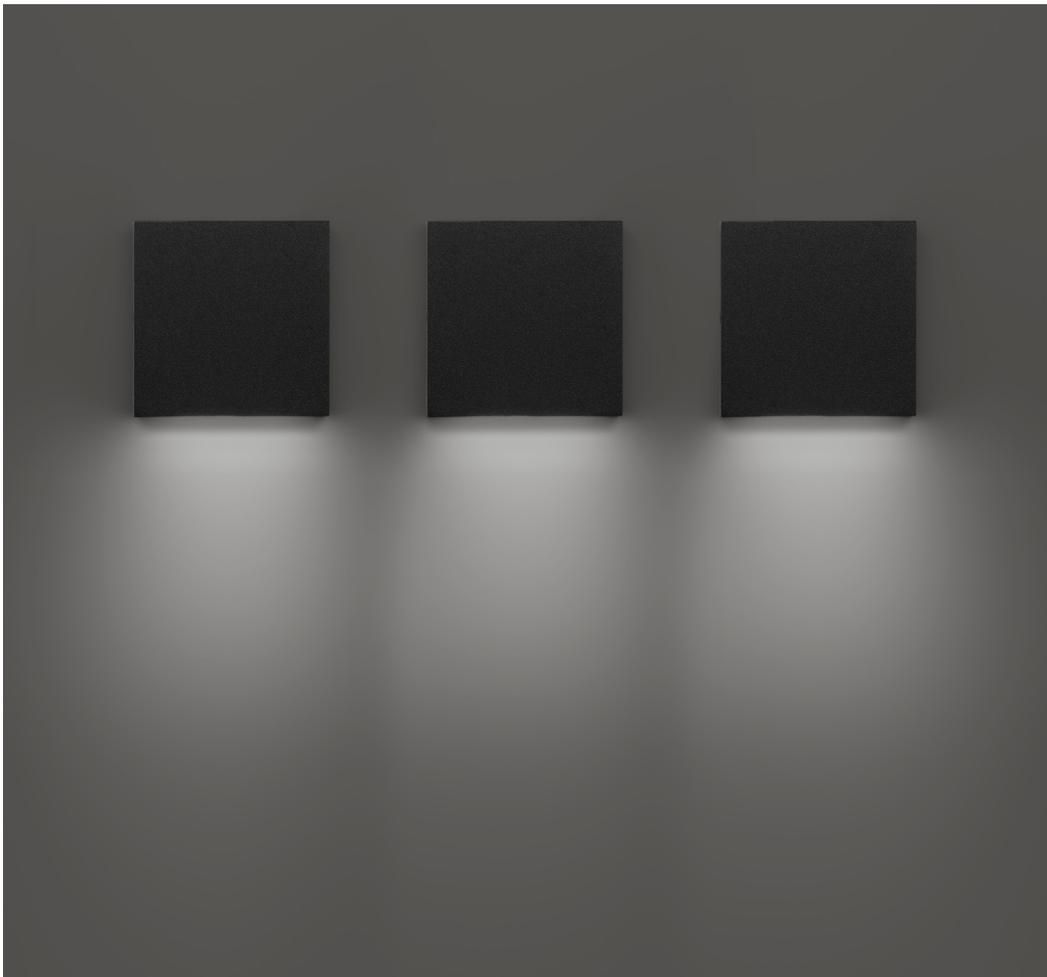

Black

Antique gold

Coffee

L'alimentatore remoto consente di mantenere il prodotto **ultra-compatto** e di gestire l'alimentazione in modo ordinato nelle installazioni multiple.

LED

Integrated **LED technology** (3000 K, 50,000 h lifetime). Driver required, not included; remotely installable, with power selectable according to the number of fixtures and wiring distances.

IP65

IP65 rating: Suitable for outdoor installation and for areas exposed to rain and dust.
