Tronco

The **Tronco** range of outdoor lights is designed for reliability and practicality **in any residential setting.**

The cylindrical diffuser and internal aluminium light-diffusing fins help to shield the light source more effectively and direct the diffused light downwards, creating a **360° radial lighting effect**,

The extensive range of **IP65** bollards is available in four heights — **255, 405, 605 and 805 mm** — and five matching finishes: white, grey, anthracite, black and coffee. The wall-mounted version retains the same design language in a compact format.

Tronco's solid, versatile design blends seamlessly and discreetly into walkways, paths, garden borders, outdoor seating and relaxation areas, specific features within green spaces, entrances and residential exterior walls.
